

ALT F4 TEAM CONSTITUTION

Article I – Team Identity and Purpose

Section 1. Team Name

The team shall be officially known as **ALT F4**.

Section 2. Mission Statement

The mission of ALT F4 is to deliver a high-quality course project that demonstrates the team's technical abilities through collaboration, professional accountability, and mutual respect. The team is committed to maintaining transparent communication, pursuing continuous improvement, and supporting one another in meeting deadlines and achieving shared objectives.

Article II – Team Membership and Roles

Section 1. Members

The members of ALT F4 shall consist of the following:

1. **Matthew Ryan Sabino**
2. **Jereign Lim**
3. **John Alec Resos**
4. **John Albert Masangkay**
5. **John Raphael Reganit**

Section 2. Roles and Responsibilities

To ensure an organized distribution of responsibilities, the following roles shall be assigned:

- **Project Manager / Developer** – Matthew Ryan Sabino
- **UI/UX Designer / Developer** – Jereign Lim
- **Technical Lead / Developer** – John Albert Masangkay
- **Tester / Developer** – John Alec Resos
- **Tester / Developer** – John Raphael Reganit

Members may assist one another beyond their assigned roles when necessary to support the successful completion of the project.

Article III – Communication

Section 1. Communication Platforms

The team shall utilize designated communication platforms to ensure effective, timely, and organized coordination among all members. The official communication platforms of the team shall include **Discord, Facebook Messenger, and Viber**.

1. **Discord Server** – The primary platform for team-wide announcements, discussions, document sharing, online meetings, and coordination of activities.
2. **Facebook Messenger** – Shall be used for quick discussions, reminders, and direct communication among members.
3. **Viber** – Shall serve as an additional communication channel for important updates and urgent matters.

All members are expected to regularly monitor the designated communication platforms and respond to important messages within the prescribed response period.

Section 2. Response Time Policy

Members shall respond to team-related messages **within five (5) hours** whenever reasonably possible.

Messages sent during late hours, defined as **10:00 PM to 8:00 AM**, shall be acknowledged no later than **10:00 AM of the following day**.

Article IV – Meetings and Attendance

Section 1. Meeting Cadence

The team shall conduct a minimum of **one to two (1–2) meetings per week**, either online or onsite, to monitor project progress, discuss concerns, coordinate tasks, and ensure compliance with established deadlines.

Section 2. Online Meetings

All online team meetings shall be conducted through the team's designated **Discord Server**, unless otherwise agreed upon by the members.

Section 3. Attendance

Attendance at scheduled team meetings is expected from all members. A member who is unable to attend shall provide advance notice to the **Project Manager**, together with a reasonable explanation, whenever circumstances permit.

Article V – Task Management and Work Standards

Section 1. Task Assignment

All project tasks shall be recorded and assigned to clearly identified owners. Members shall be responsible for completing their assigned tasks within the agreed-upon timeframe.

Section 2. Team Deadline

To provide sufficient time for quality assurance, integration, and final review, all team deliverables shall be completed **at least one (1) day before the actual deadline set by the professor**, whenever reasonably practicable.

Section 3. Ongoing Contributions

Members shall contribute to the project on an ongoing basis rather than concentrating their work immediately before deadlines. Each member is expected to maintain reasonable progress on their assigned responsibilities.

Section 4. Inability to Commit

If a member becomes unable to fulfill a commitment due to valid circumstances, the member shall notify the team as soon as possible. Where necessary, the task may be reassigned or redistributed among the members to prevent delays to the project.

Article VI – Work Quality and Code Submission

Section 1. Self-Check

Before requesting another member to review or check their work, members are expected to conduct an initial self-check to identify and correct obvious errors, inconsistencies, or incomplete requirements.

Section 2. Pull Requests

Pull Requests (PRs) shall be created only after the team has reached an agreement that the changes are ready for integration.

The member responsible for creating the Pull Request shall notify the team **before** its creation and provide an update to the team **after** the Pull Request has been created.

Section 3. Code and Project Quality

Members shall make reasonable efforts to ensure that their contributions are functional, properly tested, and consistent with the technical standards agreed upon by the team. Members are expected to address identified issues and cooperate during the review and integration process.

Article VII – Feedback and Professional Conduct

Section 1. Constructive Feedback

Feedback among members shall be delivered constructively, professionally, and respectfully. Members shall focus feedback on improving the project and addressing specific issues rather than making personal remarks.

Section 2. Mutual Respect

All members shall treat one another with respect and professionalism. Differences in opinions regarding project decisions shall be addressed through discussion and evidence-based reasoning.

Section 3. Collaboration

Members shall cooperate with one another and provide reasonable assistance when necessary. No member shall intentionally withhold information, resources, or assistance that is necessary for another member to complete their assigned responsibilities.

Article VIII – Consequences for Missed Commitments and Non-Compliance

In accordance with **Article IV of the Class Project Team Constitution**, the team shall document each instance of non-compliance together with supporting evidence, such as correspondence, timestamps, meeting records, or other relevant documentation.

The team shall apply the following graduated response:

1. **First Offense** – The member shall receive a verbal or written warning regarding the violation.
2. **Second Offense** – The member shall receive a verbal or written warning and shall be required to provide a written explanation or statement regarding the incident.

3. **Third Offense** – The member shall receive a verbal or written warning, be required to provide a written explanation or statement, and receive a **two-point (-2) demerit**, subject to the applicable class policies.
4. **Final Offense** – The matter shall be formally documented and raised to the **class representatives and instructor** for appropriate action and sanctions.

The team shall not unilaterally remove any member. Any matter that may warrant removal shall be handled in accordance with the procedures established under the **Class Project Team Constitution**, including submission of supporting evidence to the instructor for review.

Article IX – Dispute Resolution

Section 1. Internal Resolution

Any disagreement or dispute among members shall first be addressed directly by the members concerned through respectful discussion.

Section 2. Documentation

If a dispute remains unresolved, the relevant circumstances and steps taken toward resolution shall be documented.

Section 3. Escalation

Only when reasonable internal efforts have failed may the matter be referred to the appropriate class representatives or instructor, together with relevant supporting evidence.

Article X – Amendments

This Team Constitution may be amended only through the **unanimous consent of all affected team members**, provided that any amendment remains consistent with the Class Project Team Constitution.

All approved amendments shall be properly recorded and dated. No team-level amendment may override or contradict the provisions established by the Class Project Team Constitution.
